

Activity to support online video lesson:

Carnivore

1. Carnivores are animals whose food and energy requirements derive mainly from \_\_\_\_\_ or \_\_\_\_\_, whether through hunting or scavenging.
2. \_\_\_\_\_ is the term we use for an animal that feeds mainly on insects.
3. African Wild Cats are found in a wide variety of habitats, from deserts and scrub grassland to dry and mixed forest, being only absent from \_\_\_\_\_ and true \_\_\_\_\_.
4. Although domestic cats and African Wild Cats are \_\_\_\_\_ distinct, they can still \_\_\_\_\_, and therefore there is a need to control feral cats in and around rural and protected areas.
5. Leopards are the \_\_\_\_\_ predator in the western cape, they are solitary animals and are nocturnal which means that they are more active \_\_\_\_\_.
6. True or False
  - a) We can identify specific leopard individuals by matching the rosette pattern on their fur. \_\_\_\_\_
  - b) The tail of an Aardvark can be up to 30cm long. \_\_\_\_\_
  - c) Aardwolves are very dependent on water. \_\_\_\_\_
  - d) Carnivores only eat meat. \_\_\_\_\_
  - e) Bat-eared foxes, like bats, use echolocation to hunt. \_\_\_\_\_

The Cape Leopard Trust Environmental Education Project facilitates experiences in nature that change the way young people see themselves and feel about protecting the environment. Our aim is to educate and empower young people through connecting them with nature and instilling an attitude of reverence and respect for the natural environment.
